

SIMET was found in Italy in 1967. It begins its activity producing off-reelers, motorized equipment and automation devices for knitwear.

Ever since, it sells its products all over the world offering the customers a wide selection of machines for the textile industry and guaranteeing always the maximum quality level.

In 40 years of activity SIMET has developed the production of:

- ? Electronic Winders for the preparation of packages before or after dyeing;
- ? Electronic Winders for spinning, knitting and hosiery manufacturers;
- ? Electronic Winders with double positive feeder suitable for continuous or slippery or chenille yarns;
- ? Electronic Winders for picking up from bulking machines;
- ? De-knitting Winders for recovering the yarn from knitted fabrics;
- ? Assembly Winders for assembling 2 or more plies;
- ? Twisting Machines for the production of fancy yarns;
- ? Sewing Thread Winders;

40 years of experience, the extreme flexibility, the capacity of listening, understanding and satisfying the needs of the users; the continuous development of new products and "solutions" have made of SIMET and its products a steady reference point in the world survey of Textile Machinery.
